SUMMARY

I am currently working as a Full-Stack Developer at PT eBdesk Teknologi, with ~2 years of professional software engineering experience. Proficient in architecting scalable backend microservices (Python/FastAPI, Express.js, Golang, Spring Boot, Rust), managing multi-model databases (PostgreSQL, MongoDB, Elasticsearch, Redis), and building responsive web and mobile interfaces (React.js, Vue.js, Flutter). Highly skilled in integrating AI/LLM features, designing custom framework solutions (Frappe Framework), and building high-performance data pipeline engines. Strong team player with proven technical mentorship and cross-functional leadership experience in agile environments.

PROJECT EXPERIENCES

PT. Ebdesk Teknologi

Tangerang Selatan, Indonesia

Fullstack Developer / Backend Engineer

Oct 2024 – Present

- **Fusion Builder Platform:** Web builder platform that consists of 100+ dashboards and landing pages. Engineered and maintained a dynamic, high-scale web dashboard and landing page builder application using FastAPI and React.js, enabling rapid deployment, modular component rendering, and multiple custom backend pipeline management.
- **Stellar AI Assistant:** AI Assistant that has 50+ daily users. Maintained scalable backend API service that has Server Side Events gateway using FastAPI and Redis stream to power multi-tenant conversational AI, dynamic document parsing, and automated presentation slide generation via LLM orchestration.
- **Report Generator Engine:** Successfully generated 500+ documents using a high-throughput data aggregation engine in Python that seamlessly indexes and transforms data from Elasticsearch and other APIs to deliver on demand and automated reports in multiple document formats such as docx, xlsx, and pptx.
- **eBdesk HRIS:** Custom-built HR Information system for a company that consists of 500+ employees, utilizing Frappe HRMS (Frappe V16); mentored 4 junior software engineering interns during implementation.
- **What's Being Worked On (eBdesk Task Management Systems):** Internal eBdesk task-tracking web platform, utilizing Vue.js and Java Spring Boot.

PT Ameliore Solusi Analitika

Jakarta, Indonesia

Back-end Web Developer Intern

Nov 2023 – Feb 2024

- **Ameliore HRIS:** Contributed to the development of an enterprise Human Resource Information System (HRIS) backend using Java Spring Boot and relational database structures.

Freelance & Independent Projects

Jakarta / Remote

Full-Stack & Embedded Engineer

2023 – Present

- **Smart Factory RFID & IoT System for Bintang Jaya Factory:** Engineered an industrial IoT automation stock opname solution using C, NodeMCU and UHF RFID integrated with a web dashboard using react and firebase for real-time asset tracking and access control.
- **LDK Syahid Web Platform:** Maintained an official university scale organization web platform that consists of 300+ users, utilizing Laravel 8 with multiple features such as shortened link, dynamic form, donation campaign, library, financial calculation & report, etc.

- **FSLDK Indonesia Web Platform:** Developed and maintained an official national scale organizational web platform that consists of 500+ users, utilizing Angular and Golang. Containing multiple features such as QRCode generator, shortened link, dynamic form, donation campaign, library, financial calculation & report, e-commerce, etc.
- **Product Management Mobile App:** Developed a mobile application featuring an e-commerce platform and administrative dashboard using Flutter and Provider. Includes role-based authentication (Admin/User), live search suggestions, category filtering, real-time shopping cart management, and complete product & user CRUD workflows with image uploads.

ACHIEVEMENTS

Cloud Computing Cohort at Bangkit Academy 2023 Batch 1
MBKM Independent Study

Remote
Feb 2023 – Jul 2023

- Led a 6-member team consisting of machine learning, cloud and mobile cohort in creating Teman Bicara Mobile App (TEMARA, a mental health support application that enables users to connect, share experiences, and access valuable resources for better mental well-being) as a capstone project. Built back-end services using Express.js especially in creating the forum feature for community discussions and support.

EDUCATION & LEADERSHIP EXPERIENCES

UIN Syarif Hidayatullah Jakarta
Bachelor of Informatics Engineering
GPA: 3.77 / 4.00

Jakarta, Indonesia
Sep 2020 – Aug 2024

- **Relevant Coursework:** Data Structures & Algorithms, Database Systems, Software Engineering, Object-Oriented Programming, Cloud Computing, Embedded Systems.
[\[View My Course Certificates\]](#)

Robotics & Technical Mentor PinTek UIN Jakarta
Technical Instructor

Tangerang / Jakarta
Jan 2024 – Jun 2024

- Mentored students in hands-on robotics fundamentals, instructing core programming concepts in C, Arduino microcontrollers, circuit assembly, and sensor integration.

Student Activity Units (UKM) LDK Syahid UIN Jakarta
Coordinator of Journalism

Jakarta, Indonesia
Feb 2023 – Dec 2023

- Led a 6-member team in creating and publishing digital bulletins, official press releases, and media coverage for organizational initiatives.

SKILLS

- **Programming Languages:** Python, Java, Golang, Rust, JavaScript, PHP, C, HTML, CSS.
- **Frameworks & Libraries:** FastAPI, Frappe, Express.js, React.js, Vue.js, Spring Boot, Laravel, Flask.
- **Databases & Data Stores:** PostgreSQL, MongoDB, Elasticsearch, Redis, MySQL, MariaDB, Firebase
- **Tools & Platforms:** Git (GitHub/GitLab), Docker, Postman, RabbitMQ, Lens.
- **Hardware & Embedded:** Arduino, ESP32, NodeMCU, Embedded Systems.
- **Soft Skills:** Technical Leadership, Cross-Functional Collaboration, Problem-Solving, Team Mentorship, Agile Development.
